

**DIE SIPHON MANUFAKTUR**

eine Marke der Frasma GmbH · Frankfurt am Main

## **Our history**

Die Siphon Manufaktur, located in Frankfurt am Main in Germany, restores vintage soda siphons from the 1920s and 1930s to bring them back to life.

Die Siphon Manufaktur is currently focusing on soda siphons originally produced by Sparlets, the inventor of the soda siphon as we know it today. With their timeless design, unparalleled build quality, materials like mouth-blown glass and chrome plated metal parts these siphons are once again as popular as they were more than 80 years ago.

During a trip through the USA we discovered an old Sparlets soda siphon when visiting a flea market in New York and brought it back to Germany. As bourbon lovers we were fascinated by the possibility to create an authentic bourbon & soda with this soda siphon. Over time, we thoroughly restored the siphon and made it fully functional. Enthusiastic of the result and lots of positive feedback from our friends we decided to make a business out of it. And so far we have been successful.

Besides the restoration of vintage Sparlets soda siphons we offer with the Tokyo Soda Siphon a modern version of the classic siphon. Manufactured from stainless steel, drop resistant and light weighted the Tokyo Soda Siphon is perfect for use in the rough environment of professional catering and bar tending. It is safe and easy to use and just as well suited for home use. The Tokyo Soda Siphon stands out with timeless design and perfect workmanship – a basic requirement for all products of Die Siphon Manufaktur. The Tokyo Soda Siphon is part of the exhibition of the Museum of Modern Art in New York and was awarded with the "Design Of The Year Award" of the Wall Street Journal in 2010.
